EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In Specification

Before the first line: deleted reference to parent application, which was inserted by preliminary amendment filed on 9 March 2000, "This is a continuation of application Serial No. 08/935,896 filed September 23, 1997."

2. The following is an examiner's statement of reasons for allowance:
3. The claim combination, wherein the apparatus for purification of catalytic cracking gasolines comprises at least one selective hydrogenation reactor, at least one stabilization drum connected to at least one effluent outlet line from said at least one selective hydrogenation reactor and having at least one gas outlet line and at least one stabilized effluent outlet line, and at least one sweetening reactor comprising at least one effluent inlet line in fluid communication with said at least one stabilized effluent outlet line, is allowable over the prior art of record. Applicant's invention differentiates over the closest prior art Frame et al. (USP 5,064,525) because the reference does not disclose a stabilization drum having a gas outlet line, wherein said stabilization drum is between the at least one selective hydrogenation reactor and the at least one sweetening reactor. least one selective hydrogenation reactor and the at least one sweetening reactor does not comprise at least one gas outlet line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
